11	05/19/2010 3:19 AM	090013-4	81		> 60 mL/min/1.73m2		F

**Comments:**

GFR (Glomerular Filtration Rate) calculation utilizes the MDRD formula (Modification of Diet in Renal Disease Study Group) and assumes a normal adult body surface area of 1.73. If the patient is African American multiply result reported by 1.21. (Ref. National Kidney Disease Education Program.)  
\*\*\*\*\* Male/Female reference range: >60 mL/min/1.73 m2 \*\*\*\*\*  
Note: A calculated GFR of <60 mL suggests chronic kidney disease, but only if found consistently over at least 3 months. A calculated result of <15 mL is consistent with renal failure.
